

We have had such a great year in Reception and learnt so much...

Tom the Explorer sent us a parcel from... Australia! It had lots of things inside to help us start learning all about Australia.

We have explored colour mixing and used what we have learnt to create Aboriginal artwork.

We have learnt and written facts about different Australian animals.

We carried out a floating and sinking science experiment making predictions and testing different materials.

In Maths we have been doubling, halving and sharing.

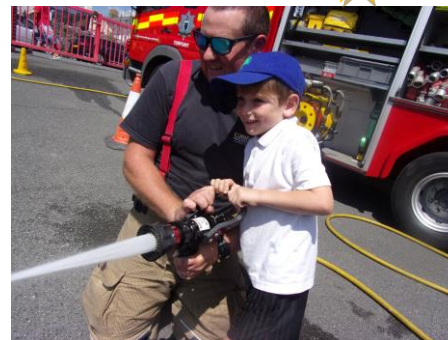

We used the balance scales to explore the weight of different objects using language such as heavier and lighter.
